SERVOMUTO

Arcipelago collection is composed by hanging and table lights. Available in two shapes called Maiorca and Minorca, characterised by the shade made out of the fire-resistant Trevira CS fringes and the body in real polished brass, details that enrich the product. The light source is a customized dimmable LED board, which, in the table version, can be regulated through a three-phase dimmer switch positioned on the base.

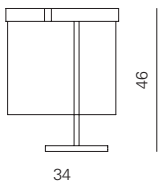

Frame	Fringes	Light source
 Polished brass finish	 "Sage green colour" fringes	 Custom LED
Optional finish  Matt light satin bronze Minimum quantity: 10 pieces	 "Sand colour" fringes  "Rust colour" fringes  "Aragosta" (bright orange) fringes  "Cognac colour" fringes  "Fog colour" fringes	Dimmable TA Three intensity levels (100 - 70 - 30%) SO Compatible with remote control systems. Please refer to the website or contact the sales office for technical details.
Cable / Switch Black fabric TA Three step push switch on the base L: 200 cm SO H: 200 cm		

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

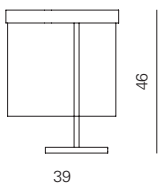

1. Fire-resistant fringes: CLASSE UNO IM - BS EN 1021.1:2006 CIGARETTE TEST - BS EN 1021.2:2006 BUTANE FLAME TEST - NPFA 260:CLASS 1 IMO A0652(16) - CIGARETTE TEST AND BUTANE TEST
2. The fringes of the model Arcipelago are washable. Keep the bag for washing. Immerse the fringes inside the bag in water and clean it at the temperature of 30°C. Rinse with flowing water. Hang while still wet. In case the fringes get shorter after washing, iron with warm iron (use the temperature for silk).
3. Use a dry cloth to clean the frame of the lamp.

ATHENA

MASSIMILIANO RAGGI

Athena is a table lamp characterised by rectangles (the base) and ovals (the shade) that blend together. The shade can be made with highly tactile fabrics, in linen or percaline, for a couture touch. The base is in dark brown stained oak with black nickel finish inserts to reaffirm a sense of balance. Athena stands as a real "passepartout".

AUDREY

MASSIMILIANO RAGGI

Iconic product inspired by the famous hat worn by Audrey Hepburn in the movie "Breakfast at Tiffany's". Designed for exclusive and elegant locations such as lobbies, boutiques, clubs, restaurants and also for classy residential environments. Audrey collection, composed by two table versions, the floor and the suspended versions, is designed as a true exercise of style. There are three shades that join together: the cotton on the upper and lower part, the very thin velvet band on the central part and the two satin trimmings. The stem is covered with braided silk rope.

Babu is an IP65 outdoor collection designed to surprise by tracing a luminous sign in the space. It is made using the innovative technology of three-dimensional digital printing on outdoor fabrics, which gives depth and creates interesting optical games. Available in three sizes and two variations of textures: Babu TEXTILE with outdoor velvet trimmings, in the colours Orange, Blue and Mustard, and Babu Tribal with its overlapping geometric designs. The base is made of champagne painted steel with the cataphoresis treatment (Marine Grade). The lamps are supplied with an IP68 connector. On request, ground anchoring is available depending on the type of surface to be fixed upon.

BACH

MASSIMILIANO RAGGI

Wall lamp, in two sizes, characterised by the alternation of metal and plexiglass tubes (it reminds of organ pipes). Very eclectic product suitable for residential and contract use: both in an elegant living room as well as in the public areas and in the corridor of a hotel. A geometric model hidden behind the tubes enriches the light effects, creating a play of shadows and shades on the plexiglass parts.

BEAM

MARIA VAFIADIS

Beam represents an evolution in the interpretation of the "lamp of purpose", from the English "task light", a category lamps for writing and reading belong to. Innovation is represented by the fact that what is moving is the light, but not the lamp. Through the three-phase switch, the light becomes adjustable and addressable according to the user's needs without having to move the structure.

BELLE

STAFFAN TOLLGARD

Family of bell-shaped lamps, made of ceramic and available in three colours. The detail of the braided silk rope embellishes the product whose shape is essential and elegant.

Frame

 Matt white lacquered canopy
 Grey braided silk rope

 "Grey mud" lacquered canopy
 Brown braided silk rope

 Bronze effect lacquered canopy
 Brown braided silk rope

Cable

Grey / brown braided silk
SO
H: 200 cm

Diffuser

 Glossy white ceramic

 Outside: glossy "grey mud" coloured ceramic
 Inside: glossy white ceramic

 DELUXE version
Glossy bronze ceramic

Light source

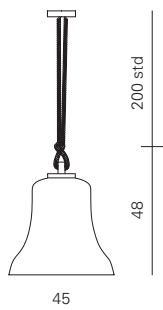

E27 LED
You can use LED light bulbs of the highest available wattage

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. DELUXE version: the finish is obtained through a metallization process which consists in the high vacuum arrangement of micro-particles of metal on the ceramic surface. It is a high quality treatment, but just as delicate.
2. Do not use abrasive products, solvents or alcohol to clean the lamp. Dust only with a dry cloth.

CALYPSO SO

SERVOMUTO

Calypso is a collection of suspensions inspired by the art deco period, with fabrics whose textures and white and black geometric patterns mix with bright colours of South American and tropical culture, providing a very original result. The indoor version is characterised by a green braided silk rope. The metal support is a satin brass finished ring. The diffuser is in transparent glass.

CALYPSO SO OUTDOOR

SERVOMUTO

Calypso outdoor is a product with IP65 protection degree, therefore a real Outdoor. Waterproof and fireproof fabrics are suitable to withstand atmospheric agents at particularly high or low temperatures while maintaining the colours and the craftsmanship quality of the product. The electric cables pass through the green coloured marine rope and the supporting frame, which is made of a smoothed solid piece in satin brass finish. The light source is housed inside a glass cylinder that is sealed to guarantee the IP65 degree of protection. The diffuser is in transparent glass.

SERVOMUTO

Calypso family is growing with the floor-standing version, again as an IP65 outdoor lamp. The product is available in three versions: single floor lamp with a shade, double structure either with a shade and a table or with two shades of the same model and finish. The light source is housed inside a glass cylinder that is sealed to guarantee the IP65 degree of protection. The lower part of the structure is black lacquered, as is the coffee table. The upper part is RAL 6011 green lacquered. The lamps are supplied with an IP68 connector.

The exclusive textures of Calypso and Babu fabrics now become the unique coating of CALYBABU: the new collection of outdoor ottomans signed by Contardi. The accessories are available in seven combinations of geometric motifs in different colours. Waterproof fabrics, water repellent polyurethane padding and structure are suitable for outdoor use. The product is supplied with an additional waterproof protective cover.

CIRCUS

ALL TOGETHER

Circus represents the philosophy of the "White Shirt", versatile and suitable for any context. A simple but complete product that allows you to customize the fabric shade with different coloured trimmings. All available sizes have the light sources mounted vertically on the support spokes to ensure homogeneous lighting without shadows. The bottom diffusing discs are made and mounted with the piano wire that allows to slightly bend the edges of the diffuser disc, in order to insert it and then place it on the inner board of the lower frame. This guarantees the so-called "drum effect", which undoubtedly is one of the most refined in terms of aesthetic finish as it does not resort to hooks or supports.

CIRCUS LED

ALL TOGETHER

Circus in the LED version is designed for use in commercial spaces such as offices and retail stores. The light source is a very compact LED board that offers the possibility - unlike the traditional version - to significantly reduce the height of the shade. Circus LED, highly performant, is compatible with the main digital remote control lighting systems, an essential feature for use in commercial space projects.

CLESSIDRA

MASSIMILIANO RAGGI

Clessidra table lamp, available in Kayros and Kronos versions, filters and at the same time contains the light through the use of vacuum metallized mirror glasses. Double switch for a dual use: bright and emotional. Available in Contardi's two iconic finishes: bronzed both in the upper and lower parts or chromed in the upper part combined with black nickel in the lower part. In both finishes the upper part is painted white on the inside to better reflect the light.

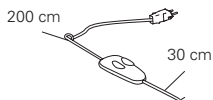

Frame

 Lower glass: black chrome metallic blown glass

Light source

 E27 LED - parte superhours
You can use LED light bulbs of the highest available wattage

 E27 Classic Deco LED - lower part

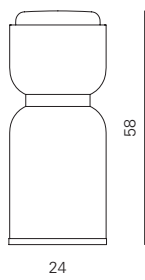

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. The glasses of Clessidra series are produced with a very delicate process of glassblowing and finishing. For this reason characteristics such as air bubbles, stripes or slightly uneven colour or shape may appear as a confirmation that these are real craftsmanship products. These characteristics are not to be considered as flaws, but as intrinsic features of the blown and handmade glass of the highest quality and uniqueness.

2. Do not use abrasive cleansers, solvents or alcohol for cleaning. Use only a soft wipe with water without excessive rubbing.

COCO & COCONETTE

TRISTAN AUER

Wall lamps, simple but sophisticated, just like their name. Coco combines the chromed structure with a bevelled mirror, while Coconette is characterised by a satin light bronze finish. They both spread the light through a three-sided fabric shade in their own colours and versions. The Coco AP Mini IP44 version is also available with a waterproof fabric shade and a protected light source to guarantee the use in bathrooms.

Light source

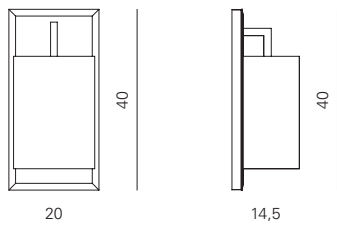

E27 LED

You can use LED light bulbs of the highest available wattage

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. The glasses of the Cornelia series are produced with a very delicate process of glassblowing and finishing. For this reason such characteristics as air bubbles, stripes or slightly uneven colour or shape may appear as a confirmation that these are real craftsmanship products. These characteristics are not to be considered as flaws, but as intrinsic features of the blown and handmade glass of the highest quality and uniqueness.
2. Do not use abrasive cleansers, solvents or alcohol for cleaning. Use only a soft wipe with water without excessive rubbing.

CRYSTAL

NIKA ZUPANC

Crystal is a table lamp, available in two sizes and finishes, whose design looks at both 1930's microphones and a slightly retro mirror. The diffuser is made of engraved crystal, whose brilliance is set off by the microleds inserted in the rear grid, in perfect correspondence with the points where the crystal incisions meet, making it a "jewel" product.

CUBE

MASSIMILIANO RAGGI

Lanterns available in two dimensions. The external structure in composite material is finished in bronze through new painting techniques with metal powders: it is impossible to tell if it is metal or not, the effect is that of satin bronze. The inner part of the lantern is in gold painted metal which creates an elegant contrast. The striped glass from which the light comes out enriches the product.

Frame

Outside: satin bronze
Inside: gold lacquered

MASSIMILIANO RAGGI

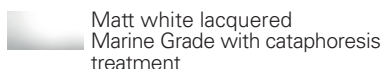

The incarnation of Contardi's philosophy of bringing the interior design to the outside for functional and classy outdoor. Cube now becomes an outdoor lantern in a rechargeable or wired battery version. To switch on the Battery version, it is enough a slight rotation of the light cylinder. It is not necessary to move the entire product for charging, but you just need to remove the battery pack and connect it to the power supply. Available with satin gold interior and light bronze lacquered effect exterior or all in white (interior and exterior).

IP65
Autonomy: 9/10 hours
Life cycles: 600
Charging time: about 4 hours
Supplied with battery charger

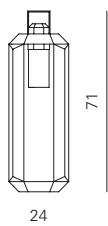

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. WIRED VERSION: supplied only with IP68 connector. In case of connection with a plug, the protection degree changes from IP65 to IP44.
2. BATTERY VERSION: Rotate the luminous part up to the first click. The first shot is the " off " position. Rotate all the way to the extraction position. Unhook and pull the luminous block towards you, which will come off easily from the base. Insert the charger into the electrical socket and place the magnetic end of the cable on that of the luminous body.

DORIAN

MARCELLO COLLI

Family of lamps in which the lighting design is integrated into the decorative one. The adjustable disc on one side is a diffuser with high performances and qualities (further improved by the new diffuser with honeycomb screen printing), on the other side is a mirror, which gives a touch of class to the product. Dorian has a dual function, direct and indirect light, to illuminate large spaces or to create only effects and reflections.

DUOS

IZEU (TRISTAN AUER & FREDERICK SICARD)

Duos is a wall lamp that has a double light source, with wiring that makes the two light sources independent. On one side there is a reading lamp, which is on the side where the metal rod is located and can be seen. The metal rod directs the light source. Note that the lamp is available in the right or left version. Having the possibility to wire them independently with two separate switches, the two light sources can be switched on at the same time or alternatively one or the other depending on the use. The standard finishes are: chrome with white interior or white with gold interior.

ECLISSE

MASSIMILIANO RAGGI

Suspension lamp with rings made of wood in bronze finish (in two shades), through new techniques of painting with metal powders: the effect is satin bronze on metal. Contardi proposes the main light, dimmable, inserted in the canopy and centered on the main ring, which creates a "shadow" effect on the surface by striking the segments of the side rings, hence the name Eclisse. The side rings on the other hand emit softer and more delicate light diffused by special acrylic material with veins, which reminds of marble. The two light sources can be controlled separately and the current is led through coaxial suspension cables without any power cable, guaranteeing the maximum neatness of form.

FLEXILED

KING & ROSELLI

An iconic Contardi model, Flexiled is available in "STEEL" version and in "LEATHER" version: in the first one the flexible arm is covered with a braided steel mesh, then wrapped in a transparent sheath. In the second one it is covered by leather with double stitching on the sides. Flexiled is characterised by high quality standards, starting with the use of a flexible brass arm (12 mm diameter), which guarantees solidity and absence of squeaking even after prolonged use. A high level of engineering and dissipation of the LED make sure that the temperature on the lamp head remains within the correct limits even after 24 hours of uninterrupted use. Easily "customizable" in leather colours, arm length and shape and the wall plate finish.

FREEDOM

MASSIMILIANO RAGGI

Freedom reproduces the shape of a cage. Its sign of recognition consists of a metallic bird placed outside the cage with a magnet, in order to symbolize freedom from any constraint. An IP65 outdoor lamp, it is available in the wired or battery version. The offer is completed by a series of black lacquered accessories which expand the possibilities of using the lamp.

Custom LED
IP65

Autonomy: 6/8 hours
Life cycles: 600 cicli
Charging time: about 4 hours
Supplied with battery charger

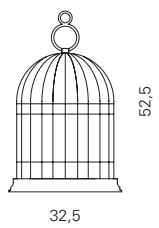

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. WIRED VERSION: supplied only with IP68 connector. In case of connection with a plug, the degree of protection changes from IP65 to IP44.
2. BATTERY VERSION: Flickering light inside the bulb indicates that the lamp is completely out of power. To stop the flickering keep the on-button pressed for a few seconds, the lamp will switch on for a short time and then switch off. Place the lamp on a flat surface, as shown, and connect the cable to the main power to charge the lamp. Make sure that the plug is correctly inserted into the socket. Let the lamp charge for approximately 4 hours (12 hours at the first use) with the lamp Off. Verify that the rubber cap is closed before use.

Innovative reading lamp, born from the idea of a portable luxury product to meet specific space and installation needs, making it suitable for environments with particular characteristics, such as yachts and superyachts, historic buildings, luxury boutiques. The head recalls the design of the dispenser for cocktails (G + T stands for Gin & Tonic), the arm is in brass covered with braided leather. Available in the battery version, with magnetic connection and in the wall-mounted version. The battery-powered version is rechargeable via the USB Type-C port (which in the wired version is used for charging smartphones or tablets). The control (with three intensity levels) is conveniently positioned on the head. The battery-powered version comes with the following accessories: wall-mounted bracket, bracket for table fixing and leather pocket with counterweight for armchair/sofa armrest.

MASSIMILIANO RAGGI

Collection of table, wall and floor lamps. Josephine looks at the world of hospitality and a charme residential, with its vintage touch. Contardi's tradition of combining elegant finishes such as satin bronze and fabric (Amalfi fabrics have been specially designed for Josephine) alternates with the proposal of a black silk structure that gives the product a more contemporary look. The floor and table versions are characterised by the joint on the arm to move the lampshade horizontally. All models are controlled via the pull switch.

Suspension lamp made of blown glass in the shape of a sphere which is cut at the base, yet pleated inside (thanks to a double mold) and gilded. Kubric can have two sizes: diameter 20 cm or diameter 14 cm, in the version with canopy but also with special attachment for the false ceiling. Kubric adapts to special "on request" compositions, which are made from time to time, without big limits in terms of size and number (please request the relative guide for special compositions). The light source is a 5W COB-LED, with mains voltage for the 230V versions.

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. The glasses of the Kubric series are produced with a very delicate process of glassblowing and finishing. For this reason such characteristics as air bubbles, stripes or slightly uneven colour or shape may appear as a confirmation that these are real craftsmanship products. These characteristics are not to be considered as flaws, but as intrinsic features of the blown and handmade glass of the highest quality and uniqueness.
2. Do not use abrasive cleansers, solvents or alcohol for cleaning. Use only a soft wipe with water without excessive rubbing.

LALA

STHÉPHANIE DU MESNIL GAILLARD

Lala is a wall lamp that combines the wengé-stained oak wood structure with the recessed mirror. Available in the version with white cotton shade or in the SOLIFLOR version, where the shade is replaced by a real glass vase, backlit by a recessed LED. Lala decorates with an unusual freshness and gives a light touch.

"The lamp that I have always dreamed to design". With these words Tristan Auer describes the Melanocetus project designed for Contardi. Essential lines, purity and balance for a recognizable sign in the environment and a designed lighting. Available in two finishes and two versions, single and double, both adjustable. The spotlights, one of which rotates 350 °, give a direct and indirect light.

NOTES:

1. The glasses of the Messalina series are produced with a very delicate process of glassblowing and finishing. For this reason such characteristics as air bubbles, stripes or slightly uneven colour or shape may appear as a confirmation that these are real craftsmanship products. These characteristics are not to be considered as flaws, but as intrinsic features of the blown and handmade glass of the highest quality and uniqueness.

2. Do not use abrasive cleansers, solvents or alcohol for cleaning. Use only a soft wipe with water without excessive rubbing.

MIKADO

MASSIMILIANO RAGGI

Collection of "jewel" lamps characterised by the combination of rectangular brass tubes and parallelepipeds in engraved crystal, with two types of workmanship. The apparently random combinations (hence the name Mikado) instead follow a precise and balanced scheme. The LED sources, inserted in the tubes in such a way as to illuminate enhancing the preciousness of the crystal, make Mikado a high-performance decorative product compatible with home automation systems.

Please refer to the website or contact the sales office for technical details.

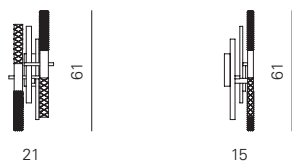

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. Real crystal diffuser: 24% by weight of lead oxide.

2. Vintage satin brass: brass-plating treatment obtained by non-homogeneous brushing. It may have halos and / or more or less noticeable spots of colour that can vary significantly from one product to another.

Moon is the first IP65 rechargeable battery suspension lamp of Contardi outdoor collection. Available in two different variants: Moon with spot light without diffuser and Moon Crystal with diffuser in "synthetic crystal". Moon Crystal is characterised by the synthetic crystal diffusers that give colour and three-dimensionality to the light. Available in battery-powered or wired versions, the battery-powered version, with a about 9 hour autonomy, can be recharged through a USB type-C port commonly used for latest-generation smartphones and tablets. Supplied with accessories and steel cable to be "hooked" and installed in a wide variety of contexts, from a tree branch to a pergola arbour rather than an outdoor tent. Switch by a clockwise rotation of the tube.

MUSE LANTERN

TRISTAN AUER

An iconic Contardi product, Muse Lantern is a lantern with an original and precious design thanks to sophisticated details such as the honey-coloured braided silk handle, the satin bronze finish and the vintage-look structure. The free standing version is available in three different sizes (small, medium and large) to adapt to any environment. The suspension has instead an elegant touch given by the metal chain with rings combined with the silk rope.

MUSE LANTERN OUTDOOR

TRISTAN AUER

Muse Lantern Outdoor can be battery-powered or wired. In the wired version the light source is placed inside a glass cylinder that is suitably sealed to guarantee IP65 protection. For the battery-powered version, a particularly interesting solution has been created: reproducing the shape of a light bulb in engraved plexiglass that, stimulated by a LED source hidden in the internal part of the structure, seems to emanate its own light. The bronze finish of Muse Lantern has obviously been treated to resist in outdoor spaces and weathering, with a braided leather handle. The plastic diffuser in the Lantern version keep the transparent amber finish.

Autonomy: 6/8 hours
Life cycles: 600
Charging time: about 4 hours
Supplied with battery charger

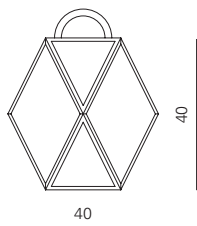

Special finishes or customized versions available for projects. Please contact the sales office.

NOTES:

1. WIRED VERSION: supplied only with IP68 connector. In case of connection with a plug, the protection degree changes from IP65 to IP44.
2. BATTERY VERSION: flickering light inside the bulb indicates that the lamp is completely out of charge. To stop the flickering keep the on-button pressed for a few seconds, the lamp will switch on for a short time and then switch off. Connect the cable to the main power to charge the lamp. Make sure that the plug is correctly inserted into the socket.
3. Remove the base to clean the inside of the lamp. Use a wet wipe.

Ongo was born from the collaboration between Tzelan, Tony Chi and Contardi, and represents the solution for the centrepiece lighting through a wireless lamp. It interprets the style and the target of the designer, who designed a high level product in material, finishes and with a battery-powered light source, produced with two adjustable light intensities. Ongo is available in a variety of elegant finishes and blown Murano glass for a mix-match style. Also available in the Large version, with a tiltable diffuser and with a plug for recharging.

RECESSED

STAFFAN TOLLGARD

The recessed lamp by Contardi, designed to illuminate corridors, passage zones and public areas. Recessed is characterised by a metal grid in satin bronze finish with decorative motifs and a white plexiglass diffuser. The mask is removable and customizable, also available on customer's design. The light source is a custom LED board, dimmable and compatible with remote control systems. The design is inspired by the stained glass windows that illuminate the Gothic style churches.

ALL TOGETHER

Rettangola New is the restyling of one of Contardi classics. Available as table, desk and floor, Rettangola New now features new finishes such as "matt light satin bronze" and the "matt black silk" that give the collection a more contemporary look along with new details that add refinement to one of the most versatile models of the collection: the new feet, now rectangular and the new shade, taller and inclined on all sides, for a more balanced design.

Sator changes clothes and presents the "Collection #2". The simplicity of the white colour is enriched by the combination of three different fabrics, hence the definition "white trilogy", enriched by trimmings in velvet. The LED sources tailored for Sator, with a very high performance, dimmable and compatible with home automation systems, make it a functional lamp to light up and decorate.

Solitario is first of all a customizable system. The main cylindrical body containing the GU10 light source is the fulcrum of the whole product family. Combined with different types of spheres and accessories it creates numerous possibilities of use, offering a variety of options for residential or commercial projects. Through the repeated use of multiple canopies, with Solitario you can "bring" light in very large rooms, starting from a single point of supply (we invite you to consult the guide with examples of installations and projects). Representative model of the "Deco-architectural" category.

NOTES:

- SMOKE SPHERE - Solitario spheres in the SMOKE finish are produced through a metallization process which consists in the high vacuum deposition of micro particles of metal on the glass surface. It is a high quality treatment, but just as delicate. Small air bubbles, strips of light, or slightly irregular colouring and shape guarantee the craftsmanship of the work, to be considered as intrinsic features of this hand-made blown glass and are not to be considered defects.
- Do not use abrasive cleansers, solvents or alcohol for cleaning. Use only a soft wipe with water without excessive rubbing.

STARDUST

MARCELLO COLLI & MAURIZIO DI MAURO

Inspired by the big classic chandeliers, but with a more essential look given by the use of metal without any additional decorative element. Stardust provides a double illumination, provided by the microled positioned at the upper ends of the individual arms and by the bulb inserted in the glass cylinder which represents the main source that illuminates downwards. Available in three standard or "custom" suspension heights.

UP

MASSIMILIANO RAGGI

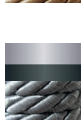

UP is a collection of lamps characterised by the combination of metal in satin bronze and chrome finishes with the braided silk which the stems are coated with (in the available combinations). The inside of the truncated cone-shaped swivel head is coated with a golden film to give a touch of style, to warm the light beam emitted by the LED bulb. Particularly versatile with a rotary switch on board.

VEGAS

MASSIMILIANO RAGGI

Vegas is the older sister of Eclisse, resuming its features, but developing in size and length. Suspension lamp with rings, made of wood with bronze finish (in two colour shades), through new techniques of painting with metal powders: the effect is satin bronze on metal. Contardi proposes the main light, dimmable, inserted in the canopy and centered on the open rings. The closed rings, in alternation, emit a softer and more delicate light, diffused by the special acrylic material with veins, which reminds of the marble. The two light sources can be controlled separately and the current is led by coaxial sealing cables, without any power cable, guaranteeing the maximum result of formal cleaning. Now also available in a total white finish.

Frame

 Satin bronze canopy

 Matt white lacquered canopy

Cable

Coaxial steel cables
H: 200 cm

Two independent light sources
Double switching

Diffuser

 Larger ring in dark bronze painted wood

XXL FL OUTDOOR

GIANLUIGI LANDONI

IP65 outdoor lamp, characterised by a fiberglass diffuser made with a double application of the material so as to arrive at a particularly important materiality of the shade, in relief, which reminds of the lunar soil. It can be particularly bright because inside the shade there are four E27 connections that allow the simultaneous use of four light sources.

GENERAL CONDITIONS OF SALE

PLEASE READ CAREFULLY

This Price List cancels and replaces any previous one. Prices are expressed in € (Euro). Contardi Lighting srl reserves the right at any time and without prior notice, to modify or remove products from the collection and to make price variations, according to technical and commercial priorities.

1. OPENING ORDERS

An order with a minimum value of € 1,000.00 NET is required to open a new customer account. Please contact sales office for more information.

2. CREDIT GRANT

The first order must be paid in full in advance unless prior credit authorization has been received.

3. LIGHT BULBS

Light bulbs are EXCLUDED, except for SOLITARIO and MELANOCETUS items.

4. ORDERS

Orders shall be considered accepted and confirmed upon Contardi Lighting written confirmation. If the order confirmation contains modifications compared to the order, these modifications will be considered tacitly accepted by the Purchaser after 3 days from the receipt of the order confirmation, unless written notice of disagreement is given by the Purchaser within the above term. Contardi, at its discretion, will charge up to 20% of the total order value if an order is cancelled after five days of the confirmation.

5. CUSTOM AND LARGE-VOLUME ORDERS

A 50% deposit is required with the confirming order and necessary signature prior to production, with the balance due before shipment of order. Costs incurred for product development, drawings, samples and related services will be COD. Custom and large volume orders are non-cancellable and non-returnable.

A signed, written confirmation is required for these orders prior to production. There will be an up-charge for lamping or voltages different from what is depicted in the catalogue.

6. PAYMENT CONDITIONS AND RETENTION OF TITLE

The Payments must be effected according to the terms agreed with the Purchaser. In the case of delayed payments the Purchaser will be charged with «delay interests». In such event, Contardi Lighting shall be entitled to suspend any shipment in progress as well as any shipment of any further order transmitted by the Purchaser. All bank expenses are for the Purchaser account. The Products shall remain property of Contardi until the payment has been made in full and the Purchaser has fulfilled all his obligations.

7. DELIVERIES AND SHIPPING

7.1 The lead time shown on order confirmations shall be deemed indicative and it is not essential. It remains suspended in case of non-payment.

7.2 The goods travel at the Purchaser's risk, even in the case the transport is organised by Contardi Lighting. It's the purchaser's responsibility to check the status of the goods upon delivery. It is therefore necessary to accept the goods with reserve or reject it if the packaging shows obvious anomalies. Should the Purchaser require to postpone a shipment, Contardi Lighting will accept to keep the goods at its warehouse for maximum 2 weeks; thereafter the goods will be invoiced and the storage costs will be charged to the Purchaser.

8. RETURNS

No returns will be accepted unless there is a quality issue. No merchandise will be accepted for return without an RMA number issued by Contardi Lighting. The RMA number must be clearly marked on all returned goods. Goods must be returned within 30 days from RMA date. No return will be allowed on custom or special order items. No credit will be issued for returned merchandise received in non-saleable or non-salvageable condition. If returned goods are damaged, any repair costs and / or the entire value of the product will be charged to the Purchaser, who will pay the total amount of the issued invoice.

Once the customer opens an RMA the company needs a clear description of the lamp problem, including photos, in order to proceed with the RMA.

Goods have to be shipped within 30 days from the date Contardi communicates the RMA number, in original packaging or in an other appropriate packaging.

After that period of time the RMA will be considered closed and replacement or repaired goods will be charged to customer.

Once the goods will arrive to our warehouse they will be tested by our technicians, who will be giving a detailed feedback on the nature of the problem and the related causes.

At this point company will proceed according to one of these options:

1) In case of production defect, Contardi will substitute/repair the lamp free of charge or, in case a replacement has already been sent and invoiced, will issue a credit note for the invoice amount.

2) If it is verified that the claimed problem has been caused through the wrong handling or tampering by the client, the client herewith commits to paying all potential repairing costs and/or replacements, sent before or after the mentioned technical tests.

Contardi will create a repair or substitution quote and customer should accept or refuse it in a written way.

If the customer requires a substitution before our technicians check the good, Contardi will reserve the right to put at customer disposal a replacement unit for a fee.

In case of production defect, Contardi will issue a credit note for the invoice amount.

In case of a negative response, the customer will pay the invoice for the RMA.

In exceptional cases company authorizes a customer to return a product due to a purchase mistake, the company will open a Restocking fee RMA. The customer will arrange and pay shipment in order to return the lamp/s in the original packaging, with RMA label on the box.

If, on the other hand, the returned goods are in perfect conditions, without any defects and packed in the original packaging, 25% of the order value will be charged for the necessary checking operation and re-packaging of the product.

9. CLAIMS FOR FREIGHT DAMAGES

9.1 Claims for damage or shortage must be filed with the inbound carrier. Retain all packaging material.

Errors in shipping: please notify customer service within 3 days of receipt.

9.2 The Purchaser is also required to accept the goods conditionally or to refuse them, should the packaging show damage or tampering

9.3 The Purchaser shall examine the goods immediately after the arrival at destination; the Purchaser shall make sure the packages are intact and correspond in number to what indicated on the shipping bill. In case of any discrepancy the buyer should take delivery of the goods with reservation.

Claims must be reported in writing to Contardi Lighting head office within 10 (TEN) days from receipt of the goods.

All notice shall be sent in writing and shall provide a detailed description of the defects (photographs are requested).

10. WARRANTY

Warranty is valid for a period of 24 months from good delivery date and cannot be suspended or prolonged in case of failure to use the goods. This warranty does not cover labor costs, nor does it apply to any product that has been improperly installed, overloaded, altered, or otherwise abused.

Due to the unsuitability of many cleaning agents, finishes are specifically excluded from the terms of this warranty.

Other than the described obligation, manufacturer assumes no further liability for the sale or use of its products.

11. OTHER CONDITIONS

11.1 Colour swatches and finishes shown in the catalogue are for reference purpose only and cannot be considered perfectly representative of real colours and products finishes.

11.2 All models are copyrighted and protected by the regulations in force. Contardi Lighting srl has the property rights to manufacture and distribute its products worldwide without any exclusion. Product copies or imitation attempts will be legally prosecuted.

11.3 Images are inserted for illustrative purpose only. Our finishes are the result of very delicate handcraft processes. Small differences and imperfections should not be considered as defects but as common traits and warranty of the high quality and the uniqueness of the product.

12. APPLICABLE LAW AND PLACE OF JURISDICTION

Sales subjected to these General Conditions are regulated by the Italian law. Any dispute between parties is the exclusive competence of Monza (MB) court.
