		<p>Nella collezione MOTION non si è voluto rinunciare alla maggiore efficienza della luce alogena evitando, con i nuovi spots GU10 a 220 volts l'utilizzo della bassissima tensione (12 volts). I vantaggi di tale soluzione sono principalmente: corrente a basso numero di amperes, quindi un minore stress dei componenti elettrici e ingombri più contenuti, venendo a mancare il trasformatore di corrente.</p> <p>The MOTION collection has chosen not to renounce the greater efficiency of halogen light, and the use of the new 220-volt GU10 spots has given the opportunity of avoiding the use of very low voltage (12 volts). The main advantage provided by this solution is low-amperage power supply and, consequently, lower voltage of the electrical components and smaller overall dimensions, since the current transformer is no longer necessary.</p>

LIGHT TOWER - 8761 (\*G)

1X60W E14

1X12W E14

\*1X75W G9

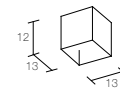

**Sospensione**  
Struttura: lamiera traforata laccata alluminio opaco con particolari in cromo lucido - schermo in policarbonato tubolare estruso opale.

**Hanging lamp**

Structure: perforated sheetmetal in matt enamelled aluminium with polished chrome details - extruded tubular polycarbonate opale.

LIGHT TOWER - 8770 (\*G)

1X60W E14

1X12W E14

\*1X75W G9

**Faretto**

Struttura: laccato alluminio opaco - particolari cromo lucido.

**Spot light**

Structure: matt enamelled aluminium - polished chrome details.
